And if this Rule shall be suspended or modified as aforesaid the promoters of any Private Bill which is presented after the time hereinbefore limited, or for which the Petition has been received after the time hereinbefore limited, shall in either case pay double the fees required as herein mentioned, unless the House shall order to the contrary. Any person seeking to obtain any Private Bill shall deposit with the Clerk of the House, eight clear days before the opening of the Session, a printed copy of such Bill, a copy of the Petition to be presented to the House, together with copies of the notices published. Such publication to be proved by affidavit or declaration to the satisfaction of the Clerk of the House. 78. All Private Bills for Acts of Incorporation shall be so framed as to incorporate by reference the clauses of the General Acts relating to the details to be provided for by such Bills. Special grounds shall be established for any proposed departure from this principle, or for the introduction of other provisions as to such details, and a note shall be appended to the Bill indicating the provisions thereof in which the General Act is proposed to be departed from. Bills which are not framed in accordance with this Rule shall be recast by the promoters and reprinted at their expense before any Committee passes upon the clauses.

82. All Private Bills shall be prepared by the parties applying for the same, and printed in Small Pica type, twenty-six ems by fifty ems, on good paper, in imperial octavo form, each page when folded measuring $10\frac{3}{4}$ inches by $7\frac{1}{2}$ inches. There shall be a marginal number every fifth line of each page; the numbering of the lines is not to be run on through the Bill, but the lines of each page are to be numbered separately. Three hundred copies of each Bill shall be deposited with the Clerk of the House immediately before the first reading. If amendments are made to any Bill during its progress before the Committee on Private Bills, or through the House, such Bill shall be reprinted by the promoters thereof.

By Rule 83, a model form of Railway Bill is adopted. A copy of same can be obtained upon application to the Clerk.

All bills to incorporate or amend Bills incorporating railway companies are to be drawn in accordance with the Model Bill.

The provisions contained in any Bill which are not in accord with the Model Bill shall be inserted between brackets.

DOMINION ORDERS IN COUNCIL.

P.C. No. 920.

CERTIFIED COPY OF A MINUTE OF A MEETING OF THE COMMITTEE OF THE PRIVY COUNCIL, APPROVED BY THE DEPUTY OF HIS EXCELLENCY THE GOVERNOR-GENERAL ON THE 19TH JUNE, 1925.

THE Committee of the Privy Council have had before them a report, dated 4th June, 1925, from the Minister of the Interior, submitting that an application has been made to the Department of the Interior, on behalf of the Bucklin Development Company, Limited, for the right to occupy a portion of the South-west Quarter of Section Nineteen, in the Fifth Township, in the Fourth Range, west of the seventh meridian, in the Railway Belt of the Province of British Columbia, for the purpose of a camp-site and other purposes in connection with extensive lumbering operations of the Company.

The Minister states that authority was granted by an Order in Council, approved on the 29th April, 1924 (P.C. 692), to issue a lease to Benjamin S. Kennedy, of Port Coquitlam, of an area of five acres and one-tenth of an acre in Section 19, for the purpose of erecting a suitable hotel thereon to be used as a summer resort. The lease was not executed and Mr. Kennedy has withdrawn his application for the land.

The Minister further states that authority was granted by an Order in Council approved on the 29th April, 1924 (P.C. 691), to issue a lease of an area of four acres and seven-tenths of an acre, lying adjacent to the Kennedy lease to the Bucklin Development Company. The lease was not executed and it is represented that this area of four acres and seven-tenths of an acre is not sufficient for the purposes of the Company, and that the whole area of nine acres and eight-tenths of an acre, as shown on the blue print which is attached hereto, is required.

The Minister, therefore, recommends that Orders in Council of the 29th April, 1924 (P.C. 692 and P.C. 691), be rescinded and that he be authorized to issue a lease to the Bucklin Development Company for the parcel; the lease to be for a term of ten years at an annual rental of \$1 per acre and subject to renewal for a further term of ten years and subject to cancellation upon six months' notice by the Minister of the Interior, and to be on such other terms and conditions as the Department of Justice may consider advisable.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Signed) E. J. LEMAIRE,
Clerk of the Privy Council.

To the Honourable
The Minister of the Interior.

DOMINION ORDERS IN COUNCIL.

P.C. No. 880.

CERTIFIED COPY OF A MINUTE OF A MEETING OF THE COMMITTEE OF THE PRIVY COUNCIL, APPROVED BY THE DEPUTY OF HIS EXCELLENCY THE GOVERNOR-GENERAL ON THE 18TH JUNE, 1925.

THE COMMITTEE of the Privy Council have had before them a report, dated 2nd June, 1925, from the Minister of the Interior, submitting that the regulations governing the granting of licences and permits to cut timber on Dominion Lands in the Prairie Provinces and in the Railway Belt, in the Province of British Columbia, provide that all timber cut must be manufactured within the Dominion of Canada.

The Abernethy-Lougheed Logging Company, Limited, who are large operators in the vicinity of Stave Lake, in the Railway Belt, report that they have a large stock of cedar timber on hand which they are unable to dispose of in the local market owing to there being an oversupply, and they ask to be allowed to export this timber for a period of six months. The Agent of the Department of the Interior at New Westminster, who is in charge of the operations, corroborates the statement made by the applicants and recommends that their request be granted, subject to dues at \$2 per thousand feet B.M. on logs grading No. 1, \$1.50 per thousand feet B.M. on logs grading No. 2, and \$1 per thousand feet B.M. on logs grading No. 3, which rates on grades Nos. 1 and 2 are in excess of those charged under the regulations on timber disposed of locally.

The Committee, on the recommendation of the Minister of the Interior, advise that the request of the Company be granted for a period of six months, at the rates specified.

(Signed) E. J. LEMAIRE,
Clerk of the Privy Council.

ORDERS IN COUNCIL.

"COAL-MINES REGULATION ACT."

PURSUANT to the provisions of the "Coal-mines Regulation Act," chapter 171, section 128, R.S.B.C. 1924, His Honour the Lieutenant-Governor in Council has been pleased to approve of the following rules governing the use of electrical power in coal-mines:—

1. It shall be the duty of the mine-owner, agent, and manager to comply with and enforce the following regulations, and it shall be the duty of all workmen and persons employed to conduct their work in accordance with the regulations.

2. "Pressure" means the difference of electrical potential between any two conductors, or between a conductor and earth as read by a hot wire or electro-static volt meter.

"Low pressure" means a pressure in a system normally not exceeding 250 volts where the electrical energy is used.

"Medium pressure" means a pressure in a system normally above 250 volts, but not exceeding 650 volts, where the electrical energy is used.

"High pressure" means a pressure in a system normally above 650 volts, but not exceeding 3,000 volts, where the electrical energy is used or supplied.

"Extra-high pressure" means a pressure in a system normally exceeding 3,000 volts, where the electrical energy is used or supplied.

"System" means an electrical system in which all the conductors and apparatus are electrically connected to a common source of electromotive force.

"Concentric system" means a system in which the circuit in a conductor or conductors, called the inner conductor, is completed through one or more conductors, called the outer conductor, arranged so that the inner conductor is insulated and the outer conductor is disposed over the insulation of, and more or less completely around, the inner conductor.

"Conductor" means an electrical conductor arranged to be electrically connected to a system.

"Apparatus" means electrical apparatus, and includes all apparatus, machines, and fittings in which conductors are used or of which they form a part.

"Circuit" means an electrical circuit forming a system or branch of a system.

"Covered with insulating material" means adequately covered with insulating material of such quality and thickness that there is no danger.

"Metallic covering" means iron or steel armouring, with or without a lead or other metallic sheath as the conditions of the case may require, or an iron or steel pipe surrounding two or more conductors.

"Bare" means not covered with insulating material.

"Live" means electrically charged.

"Dead" means at, or about, zero potential, and disconnected from any live system.

"Open sparking" means sparking which owing to the lack of adequate provision for preventing the ignition of inflammable gas external to apparatus would ignite such inflammable gas.

"Earthed" means connected to the general mass of earth in such manner as will ensure at all times an immediate discharge of electrical energy without danger.

"Earthing system" means an electrical system in which all the conductors are earthed.

"Switch-gear" means switches or fuses, conductors, and other apparatus in connection therewith used for the purpose of controlling the current or pressure in any system or part of a system.

"Authorized person" means a person appointed in writing by the manager of the mine to carry out certain duties incidental to the generation, transformation, distribution, or use of electrical energy in the mine, such person being a person who is competent for the purposes of the rule in which the term is used.

"Electrician" means a person appointed in writing by the manager of the mine to supervise the apparatus in the mine and the working thereof, such person being a person who is over 21 years of age and is competent for the purposes of the rule in which the term is used.

"Danger" means danger to health or danger to life or limb from shock, burn, or other injury to persons employed, or from fire or explosion attendant upon the generation, transformation, distribution, or use of electrical energy.

"Use" of electricity means the conversion of electricity into mechanical energy, heat, or light for the purpose of providing mechanical energy, heat, or light.

3. (1.) The use of electricity is prohibited in any part of a mine where, on account of the risk of explosion of gas or coal-dust, such use would be dangerous to life.

(2.) If at any time in any place in the mine the percentage of inflammable gas in the general body of the air in that place is found to exceed one and a quarter, the electric current shall at once be cut off from all cables and other electrical apparatus in that place, and shall not be switched on again as long as the percentage of inflammable gas exceeds that amount: Provided that nothing in this subsection shall apply to any telephone or signalling wires or instruments as long as the conditions prescribed with reference to the installation and use of such wires and instruments are complied with, nor to any electric hand-lamps of a type for the time being approved.

(3.) In case any difference of opinion shall arise between an Inspector and an owner, agent, or manager under this rule, the same shall be settled as provided in the "Coal-mines Regulation Act," section 99, chapter 171.

4. Notices shall be sent to the District Inspector of Mines on the forms prescribed by the Minister, as follows, namely:—

(a.) Notice of any existing apparatus. To be sent within one month from the date on which these rules come into force:

(b.) Notice of intention to introduce apparatus into any mine, or into any ventilating district in any mine:

(c.) Notice of the intention to introduce or re-introduce electricity into any mine where the use of electricity has previously been prohibited under Rule 3:

(d.) An annual return giving the size and type of apparatus and any particulars which may be required by the Minister as to the circumstances of its use. To be sent on or before the 21st day of January of every year.

5. If the District Inspector does not object in writing, within one calendar month from the receipt by him of the notice, to the carrying-out of either of the intentions specified in the second or third notices, the owner shall be entitled to carry out such intention or intentions: Provided that this rule shall not apply to telephone and signalling apparatus.

6. The owner, agent, or manager of every mine in which electricity is used underground shall keep in the office at the mine a correct plan on the same scale as that required to be kept at the mine in fulfilment of the requirements of the "Coal-mines Regulation Act," showing up to a date not more than three months previous the position of all fixed apparatus in the mine, other than telephones and signalling apparatus; said plan shall be produced to an Inspector at any time on his request.

7. The following notices, constructed of durable material, shall be exhibited where necessary:—

- (a.) A notice prohibiting any person other than an authorized person from handling or interfering with apparatus;
- (b.) A notice containing directions as to procedure in case of fire. This notice shall be exhibited in every place containing apparatus other than cables, telephones, and signalling apparatus;
- (c.) A notice containing directions as to the restoration of persons suffering from the effects of electric shock;
- (d.) A notice containing instructions how to communicate with the person appointed under Rule 14 (1). This notice shall be exhibited at the entrance to the mine in the case of a mine entered otherwise than by shafts, and in case of a mine entered by shafts, at the shaft-bottom.

8. (1.) In all places lighted by electricity where a failure of the electric light would be likely to cause danger, one or more safety-lamps or other proper lights shall be kept continuously burning.

(2.) Efficient telephonic or other equivalent means of communication shall be provided for communicating between the place in which the switch-gear provided under Rule 14 (1) is erected and the shaft-bottom or main distributing centre in the mine.

(3.) Fire-buckets of suitable capacity, filled with clean, dry sand ready for immediate use in extinguishing fires, shall be kept in every place containing apparatus, other than cables, telephone and signalling apparatus.

9. (1.) Where necessary to prevent danger or mechanical damage, all switch-gear shall be placed in a separate room, compartment, or box. No transformers shall be placed in any mine underground and no transformer of over medium pressure shall be installed in any building in connection with the mine.

(2.) Unless the apparatus is so constructed, protected, and worked as to obviate the risk of fire, no inflammable material shall be used in the construction of any room, compartment, or box containing apparatus, or in the construction of any of the fittings therein. Each such room, compartment, or box shall be substantially constructed and shall be kept dry.

(3.) Adequate working-space and means of access clear of obstruction and free from danger shall be provided for all apparatus that has to be worked or attended to by any person, and all handles intended to be operated shall be conveniently placed for that purpose.

10. (1.) All apparatus and conductors shall be sufficient in size and power for the work they may be called upon to do, and so constructed, installed, protected, worked, and maintained as to prevent danger.

(2.) All insulating material shall be chosen with special regard to the circumstances of its proposed use. It shall be of mechanical strength sufficient for its purpose, and it shall be of such a character or so protected as fully to maintain its insulating properties under working conditions of temperature and moisture.

(3.) Every part of a system shall be kept efficiently insulated from earth, except that:—

- (a.) The neutral point of polyphase system may be earthed at one point only;
- (b.) The mid-voltage point of any system, other than a concentric system, may be earthed at one point only; and

(2.) Where the cables are provided with a metallic covering constructed and installed in accordance with Rule 15 (c), such metallic covering may be used as a means of connection to the earthing system. All the conductors of an earthing system shall have a conductivity of all parts and at all joints at least equal to 50 per cent. of that of the largest conductor used solely to supply the apparatus, a part of which it is desired to earth; provided that no conductor of an earthing system shall have a cross sectional area of less than No. 6 B. & S. gauge.

(3.) All joints in earth conductors and all joints to the metallic covering of the cables shall be properly soldered or otherwise efficiently made, and every earth conductor shall be soldered into a lug for each of its terminal connections. No switch, fuse, or circuit-breaker shall be placed in any earth conductor.

12. No pressure other than low or medium pressure shall be used in any mine underground.

13. Switch-gear and all terminals, cable-ends, cable-joints, and connections of apparatus shall be constructed and installed so that:—

- (a.) All parts shall be of mechanical strength sufficient to resist rough usage;
- (b.) All conductors and contact areas shall be of ample current-carrying capacity, and all joints in conductors shall be properly soldered or otherwise efficiently made;
- (c.) The lodgment of any matter likely to diminish the insulation and of coal-dust on or close to live parts shall be prevented;
- (d.) All live parts shall be so protected or enclosed as to prevent accidental contact by persons and danger from arcs or short circuits, fire or water;
- (e.) Where there may be risk of igniting gas, coal-dust, or other inflammable material, all parts shall be so protected as to prevent open sparking.

14. (1.) Properly constructed switch-gear for cutting off the supply of current to the mine shall be provided at the surface of the mine, and during the time any cable is live a person authorized to operate the said switch-gear shall be available within easy reach thereof. Lightning-arresters, properly adjusted and maintained, shall be provided where necessary to prevent danger.

(2.) Efficient means, suitably placed, shall be provided for cutting off all pressure from every part of a system as may be necessary to prevent danger.

(3.) Such efficient means shall be provided for cutting off all pressure automatically from the part or parts of the system affected in the event of a fault as may be necessary to prevent danger.

(4.) Every motor shall be controlled by switch-gear for starting and stopping, so arranged as to cut off all pressure from the motor and from all apparatus in connection therewith, and so placed as to be easily worked by the person appointed to work the motor.

(5.) If the concentric system is used, no switch, fuse, or circuit-breaker shall be placed in the outer conductor or in any conductor connected thereto, except that, if required, a reversing-switch may be inserted in the outer conductor at the place where the current is being used. Nevertheless, switches, fuses, or circuit-breakers may be used to break the connection with the generators or transformers supplying the electricity; provided that the connection of the outer conductor with the earthing system shall not thereby be broken.

(6.) Each branch circuit inside a mine shall be controlled by an independent switch and all switches shall be of the oil type.

15. All cables, other than flexible cables for portable apparatus and signalling-wires, shall comply with the following requirements:—

(a.) They shall be covered with insulating material (except that the outer conductor of a concentric system may be bare). The lead sheath of lead sheathed cables and the iron or steel armouring of armoured cables shall be of not less thickness respectively than is recommended by the Engineering Standards Committee:

(b.) They shall be efficiently protected from mechanical damage and supported at sufficiently frequent intervals and in such a manner as adequately to prevent danger and damage to the cables:

(c.) Concentric cables, or two-core or multi-core cables protected by a metallic covering, or single core cables protected by a metallic covering which shall contain all the conductors of the circuit, shall be used:—

(i.) Where the roadway conveying the cables is also used for mechanical haulage; and

(ii.) Where there may be risk of igniting gas, coal-dust, or other inflammable material:

Provided that if the medium-pressure direct-current system is used:—

(i.) Two single-core cables protected by metallic coverings may be used for any circuit if the said metallic coverings are bonded together by earth conductors so placed that the distance between any two consecutive bonds is not greater than 100 feet measured along either cable; and

(ii.) Two single-core cables covered with insulating material efficiently protected otherwise than by a metallic covering may be used in side-roads (except in side-roads which are also used for mechanical haulage, or where there may be risk of igniting gas, coal dust, or other inflammable material) for the purpose of supply portable apparatus:

(d.) Cables shall be properly secured by some non-conducting and readily breakable material to efficient insulators:

(e.) The metallic covering of every cable shall be:—

(i.) Electrically continuous throughout;

(ii.) Earthed, if it is required by Rule 11 (1) to be earthed, by a connection to the earthing system of not less conductivity than the same length of the said metallic covering;

(iii.) Efficiently protected against corrosion where necessary;

(iv.) Of a conductivity at all parts and all joints at least equal to 50 per cent. of the conductivity of the largest conductor enclosed by the said metallic covering:

(v.) Where there may be risk of igniting gas, coal-dust, or other inflammable material, so constructed as to prevent as far as is practicable any fault or leakage of current from the live conductors for causing open sparking:

Provided, where two single-core cables protected by metallic coverings bonded together in accordance with Rule 15 (c) are used for a circuit, the conductivity of each of the said metallic coverings at all parts and at all joints shall be at least equal to 25 per cent. of the conductivity of the conductor enclosed thereby:

(f.) Cables and conductors where joined up to motors, transformers, switch-gear, and other apparatus shall be installed so that:—

(i.) They are mechanically protected by securely attaching the metallic covering (if any) to the apparatus; and

(ii.) The insulating material at each cable-end is efficiently sealed so as to pre-

vent the diminution of its insulating properties. Where necessary to prevent abrasion or to secure gas-tightness there shall be properly constructed bushes.

16. (1.) Flexible cables for portable apparatus shall be two-core or multi-core and covered with insulating material which shall be efficiently protected from mechanical damage. If a flexible metallic covering be used either as the outer conductor of a concentric system or as a means of protection from mechanical damage, the same shall not alone be used to form an earth conductor for the portable apparatus.

(2.) Every flexible cable for portable apparatus shall be connected to the system and to the portable apparatus itself by a properly constructed connector.

(3.) At every point where flexible cables are joined to main cables a switch capable of entirely cutting off the pressure from the flexible cables shall be provided.

(4.) No lamp-holder shall be in metallic connection with the guard or other metalwork of a portable lamp.

17. (1.) Every person appointed to work, supervise, examine, or adjust any apparatus shall be competent for the work that he is set to do. No person, except an electrician or a competent person acting under his supervision, shall undertake any work where technical knowledge or experience is required in order to adequately avoid danger.

(2.) An electrician shall be appointed in writing by the manager of the mine to supervise the apparatus. If necessary for the proper fulfilment of the duties detailed in the succeeding sections of this rule, the manager shall also appoint in writing an assistant or assistants to the electrician.

(3.) The electrician shall be in daily attendance at the mine. He shall be responsible for the fulfilment of the following duties, which shall be carried out by him or by an assistant or assistants duly appointed under subsection (2):—

(a.) The thorough examination of all apparatus (including the testing of earth conductors and metallic covering for continuity) as often as may be necessary to prevent danger; and

(b.) The examination and testing of all new apparatus and of all apparatus re-erected in a new position in or about the mine before it is put into service in the new position; provided that in the absence of the electrician for more than twenty-four hours the manager shall appoint in writing an efficient substitute.

(4.) The electrician shall keep at the mine a log-book made of daily log-sheets kept in the form prescribed by the Minister. The said log-book shall be produced at any time to an Inspector on his request.

(5.) Should there be a fault in any circuit, the part affected shall be made dead without delay, and shall remain so until the fault has been remedied.

(6.) All apparatus shall be kept clear of obstruction and free from dust, dirt, and moisture, as may be necessary to prevent danger. Inflammable or explosive material shall not be stored in any room, compartment, or box containing apparatus, or in the vicinity of apparatus.

(7.) Adequate precautions shall be taken by earthing or other suitable means to discharge electrically any conductor or apparatus or any adjacent apparatus, if there is danger therefrom, before it is handled and to prevent any conductor or apparatus from being accidentally or inadvertently electrically charged when persons are working thereon. While lamps are being changed the pressure shall be cut off.

(8.) The person authorized to work an electrically driven portable machine shall not leave the machine while it is working, and shall, before leaving the place, see that the pressure is cut off from the flexible trailing cable which supplies such portable machine. Trailing cables shall not be dragged along by the machine when working.

(9.) Every flexible cable shall be examined at least once in every fourteen days by the electrician, and if used with a portable machine, at least once

in each shift by the person authorized to work the machine. A correct report of each of these inspections shall be made immediately in a book kept at the mine for that purpose. If a flexible cable is found damaged or defective it shall forthwith be replaced by a spare cable in good and substantial repair. Such damaged or defective cable shall not be further used underground until after it has been sent to the surface and there properly repaired.

18. In any part of a mine in which inflammable gas or coal dust, although not normally present, is likely to occur in quantity sufficient to be indicative of danger, the following additional requirements shall be observed:—

- (a.) All cables, apparatus, signalling-wires, and signalling-instruments shall be constructed, installed, protected, worked, and maintained so that in the normal working thereof there shall be no risk of open sparking;
- (b.) All motors shall be constructed so that when any part is live all rubbing contacts (such as commutators and slip-rings) are so arranged or enclosed as to prevent open sparking;
- (c.) The pressure shall be switched off apparatus forthwith if open sparking occurs, and during the whole time that examination or adjustment disclosing parts liable to open sparking is being made. The pressure shall not be switched on again until the apparatus has been examined by the electrician or one of his duly appointed assistants, and the defect (if any) has been remedied or the adjustment made;
- (d.) Every electric lamp shall be enclosed in an air-tight fitting, and the lamp-globe itself shall be hermetically sealed;
- (e.) A safety-lamp shall be provided and used with each motor when working, and should any indication of fire-damp appear from such safety-lamp, the person appointed to work the motor shall forthwith cut off the pressure therefrom and report the matter to the overman or other official.

19. (1.) Current from lighting or power circuits shall not be used for firing shots.

(2.) Shot-firing cable shall be covered and protected as provided by Rule 16 (1) for flexible cables. Adequate precautions shall be taken to prevent them from touching other cables and apparatus.

20. (1.) Where electricity is used for signalling, current from lighting and power circuits shall not be used, and the pressure in any one circuit shall not exceed 25 volts.

(2.) Contact-makers shall be so constructed as to prevent the accidental closing of the circuit.

(3.) Adequate precaution shall be taken to prevent signal and telephone wires from touching cables and other apparatus.

21. Haulage by electric locomotives on the overhead trolley-wire system is prohibited underground in any coal-mine.

22. Haulage by storage-battery locomotives may be used in any mine with the consent in writing first obtained of the Minister of Mines in all cases, and subject to such conditions affecting safety as may be prescribed by him.

23. Any of the foregoing requirements shall not apply in any case in which exemption is obtained from the Minister of Mines on the grounds either of emergency or special circumstances, on such conditions as the Minister may prescribe.

All of the above regulations to come into effect on the 1st day of September, 1925, with the exception of Regulations Nos. 9 (1), 12, and 21, to be effective on the 1st day of January, 1926.

Further, that Regulation No. 21 shall not apply before the 1st day of April, 1930, to any overhead trolley-wire system which was in use underground prior to the 1st day of January, 1925.

ORDERS IN COUNCIL.

"COAL-MINES REGULATION ACT."

PURSUANT to the provisions of the "Coal-mines Regulation Act," chapter 171, section 128, R.S.B.C. 1921, His Honour the Lieutenant-Governor in Council has been pleased to approve of the following regulations for precautions against coal-dust:—

1. The following regulations shall apply to all coal-mines, except mines of which the floor, roof, and sides of the roads are naturally wet throughout.

2. The floor, roof, and sides of every road or part of a road which is accessible shall be treated in one of the following ways, either:—

(a.) They shall be treated with incombustible dust in such manner and at such intervals as will ensure that the dust on the floor, roof, and sides respectively shall always consist throughout of a mixture containing not more than 50 per cent. combustible matter; or

(b.) They shall be treated with water in such manner and at such intervals as will ensure that the dust on the floor, roof, and sides respectively is always combined throughout with 30 per cent. by weight of water in the intimate mixture; or

(c.) They shall be treated in such other manner as the Minister of Mines may approve:

Provided that the percentage of incombustible dust required under this regulation may be reduced by an amount equivalent to the percentage of water present in the mixture:

Provided also that the obligation imposed by this regulation shall not apply in respect of any road or part of a road if, and so long as, the natural conditions thereof as regards presence of incombustible dust and moisture are found by tests made in accordance with these regulations to be such as to comply with the foregoing requirements.

3. The incombustible dust used for the purpose of the preceding regulation shall contain not less than 50 per cent. by weight of fine material capable when dry of passing a sieve with 200 meshes to the lineal inch (40,000 to the square inch): Provided that if a larger proportion of incombustible dust is used than is required under the foregoing regulation, the percentage of fine material aforesaid contained in the incombustible dust may be reduced proportionately, but shall not fall below 25 per cent.

4. For the purpose of testing the composition of the dust mixture in any part of a road, the following procedure shall be adopted:—

(a.) Representative samples of the dust shall be collected from the floor, roof, and sides respectively over an area of road not less than 50 yards in length:

(b.) Each sample collected shall be well mixed and a portion of the mixture shall be sieved through a piece of metallic gauze having a mesh of 28 wires to the lineal inch:

(c.) A weighed quantity of the dust which has passed through the sieve shall be dried at 212° Fahrenheit and the weight lost shall be reckoned as moisture. The sample shall then be brought to a red heat in an open vessel until it no longer loses weight. The weight so lost by incineration shall be reckoned as combustible matter for the purposes of the test.

Tests of samples of dust, so taken as to be representative of the normal composition of the dust throughout the roads of the mine on the floor, roof, and sides respectively, shall be made as often as may be necessary, but not less frequently than once a month.

The results of the test shall be posted at the entrance to the mine and recorded in a book to be kept at the mine for the purpose:

Provided that if the representative tests show in respect of any mine or any part of the mine that the natural conditions as regards presence of in-

combustible dust and moisture are such as to comply with the requirements of this regulation, it shall suffice thereafter to make representative tests in respect of that mine, or that part of a mine, at intervals not exceeding three months, or such longer intervals as may be approved in writing by the Inspector of the district.

5. No dust shall be used for the purpose of complying with these regulations of a kind which may be prohibited by the Minister of Mines on the ground that it would be injurious to the health of persons working in the mine:

Provided that if any dispute arises as to whether the dust is injurious, it shall be determined in manner as provided by section 99 of the "Coal-mines Regulation Act."

The above regulations to come into force on the 1st day of September, 1925: Provided, however, that if it is shown to the satisfaction of the Inspector of Mines of the district, in regard to any mine, that it has not been practicable by that date to obtain the necessary plant to carry out said regulations, the said District Inspector may, subject to such conditions as he thinks fit, allow such extension of time as shall appear to him to be reasonably required.
